---	--------------------------------------

- Involved with the Web3 backend, I was responsible for implementing features, fixing breaking changes, and thinking of innovative options to increase the volume.

## PROJECTS

---

### Stratify (Eth London (Morpho Blue 2024 track winners)

Personal project awarded at ETH London focused on DeFi asset management, with the objective of increasing the margins of crypto custodians.

### TimeFi (ETH Barcelona winner project 2023)

Built a time tokenization platform to bring supporters and influential people closer together, making the scarcest asset we have (time) more liquid.

### Packed (Telefónica, Block and Change hackathon winner 2023)

Built a project that decentralizes mobile data to create a new market where people can buy data as if it were a normal asset, without attachment to specific carriers or contracts.

### Scholario (Esade and IE StartUp Turbo 2023 and 2024 winner)

Developed a platform that aims to match talent with companies, with an innovative approach for keeping the incentives of both actors in place.

### Corewar

Built a project in C that simulates a fight in the computer's memory.

## EDUCATION

---

<b>Bachelor's + Master's in Software Engineering</b> , EPITECH - European Institute of Technology 2022 - Present	
<b>High School Degree in Science and Technology</b> , IES Sant Quirze del Vallès	2020 - 2022

## EXTRA-CURRICULAR ACTIVITIES

---

Self-education in business and finance in order to gain a macroeconomic global vision of the industry.
